CORE COMPETENCIES

- Content strategy
- Information architecture
- User research & co-design
- Cross-functional alignment (policy, legal, research)
- Prompt design & evaluation
- Terminology systems
- AI prototyping (Figma, Codex)
- Growth experimentation
- Developer-experience writing
- Model behavior

LEADERSHIP

- Wrote content design column
- Built widely adopted team templates
- Figma squad lead & mentor
- Content engineering lead

EDUCATION

University of California, Santa Barbara
B.A., Environmental Studies

About

Content designer with nearly a decade designing products that help people understand and trust technology. I shape the words, structure, and systems behind a product, from naming and information architecture to plain-language content that works across reading levels and markets. I partner with AI researchers, engineers, product managers, and designers to define model behavior, establish AI communication standards, and build evaluation-informed experiences. I combine strong product judgment with deep expertise in language to turn content expertise into systems teams can scale.

Experience

Meta

Content designer | 2017 – 2026

Meta Superintelligence Labs — AI products

- Authored Meta's canonical **AI content standards**, establishing principles for transparency, trust, attribution, and responsible AI communication across Meta AI products.
- Led content design for **Agentic Research Environments (ARE)**, partnering with AI researchers on prompt design, terminology systems, naming, and model evaluation communication for frontier AI research. Named in the acknowledgments of the landmark ARE & GAIA2 publication.
- Led content design for one of Meta AI's **highest-impact consumer growth initiatives**.
- Designed and built an **AI-assisted content generation and evaluation tool** that drafts and ranks copy against editorial principles, scaling experimentation across teams.
- Partnered closely with AI researchers, engineers, and product teams to define how model capabilities, uncertainty, and evaluation are communicated to users.

Instagram Giving & social impact

- Shipped **Donate stickers**, driving 37% of all donations on Instagram.
- Ideated and launched **Donation matching**, increasing dollars raised up to 65% and donation conversion up to 27%.
- Brought **Early Warnings for All** to Facebook, increasing “Marked Safe” check-ins by 5%.

Connectivity

- Led the **Free Facebook → Flex** rebrand across dozens of markets.
- Delivered critical **WHO health information** during the COVID-19 pandemic.
